Water African Project

About us

WAP (Water African Project) is a service-sector company specialised in providing equipment and process engineering in the field of drinking water and sanitation.

WAP is committed to fighting the inequalities of access to drinking water in Africa by offering quality solutions and equipment adapted to African realities.

Packaging & packing
are suited
maritime transport
and to optimise volume

A team of engineers and technicians

Experts in the field of pumping and water treatment with over 20 years of experience in the African market, we address and define your needs as a whole.

Our values

Quality

Controlled, renowned and sustainable material for the best price and service

Empathy

Understanding of field-linked challenges and local needs

Adaptability

We adapt to the market's evolution with you

Effectiveness

We work in tight flow conditions and ship as fast as possible

Reliability

We continue being present once the project is delivered

A close-up photograph of a young girl with dark skin and hair, wearing a small gold earring and a colorful beaded bracelet. She is looking down at a public water tap, with her hands cupped under the spout to catch water. The background is a soft, out-of-focus green, suggesting an outdoor setting. The lighting is natural, highlighting the texture of her skin and the clarity of the water.

"Thanks to our technical expertise and knowledge of the African markets, we provide excellent service in managing your projects."

Why choose to work with us

Ideal means

32 292 sq ft of land

Covered area of **5 382 Sq ft**

A loading dock

Less than 2 hours away from Marseille port

Continent experience

20+ years of experience in Africa

Present in **24 sub-Saharan African countries**

Double-digit growth rates

Our competitiveness

A lightweight structure

No intermediaries

Reduced cost

You & Us

A win-win relationship

**Let's combine
our expertise**
